HIGHLIGHTS AT ELYTIS

At Elytis, we create an environment for inspiration and for building a great team with personal growth and inclusivity at the heart of our values. Our latest video offers a glimpse into how we achieve this synergy.

OUR EVENTS

COO Vincent Bourelly attends CrowdStrike's annual Partner Summit in Las Vegas

The Fal.Con 2023 conference in Las Vegas took place from 18 to 21 September and featured over three days of impressive A-list keynotes, including a presentation by George Kurtz, the CEO and founder of Crowdstrike. This unmissable summit offered exceptional networking opportunities and entertainment, and our COO, Vincent Bourelly and Frédéric Gosset from Spilog in French Polynesia attended the conference.

A glimpse from Vincent: *"After the Partner Summit where we heard about the new Crowdstrike Partner Program, we had the first keynote by George Kurtz. Exciting announcements were made on Charlotte AI, Data Protection, Falcon for IT amongst others!"*

The first day was devoted to CrowdStrike's annual Partner Summit, with briefings on the cybersecurity company's innovations and partner go-to-market strategies, followed by the Fal.Con Hub which offered attendees the chance to engage with live, hands-on demos of the latest cutting-edge cybersecurity solutions that can work with the CrowdStrike Falcon Platform. The summit was jam-packed with major announcements and updates across Cloud Security, Artificial Intelligence, and much more.

As the saying from Mike Sentonas, CrowdStrike President, goes: *"To win in Formula 1, you need to be the fastest. To win in security, you need to be faster than the adversary."*

Lexmark MX431adn: monochrome and green

With its compact form, a 40-pages per minute print speed, double-sided automatic scanning, copying and faxing, as well as expandable paper capacity, the Lexmark MX431adn is the perfect monochrome printer for enjoying a user-friendly experience and great performance.

Moreover, the Lexmark MX431adn is a "green" printer, thanks to its energy saving and ink recharge characteristics. With its robust build, it's not one to be sent to the trash soon. It meets EPEAT® Silver and ENERGY STAR® certifications and makes the most of standard two-sided printing and energy-saving modes, while supporting recycling through Lexmark Cartridge Collection Programme (LCCP) and Lexmark Equipment Collection Programme (LECP).

# Jabra Speak2 55: a meeting room in the pocket

It looks like an ice hockey puck, but its playing ground is the office or home. The Speak2 55 is the next-gen flexible speakerphone from Jabra, with outstanding sound quality and smart features. One of those is the advanced full duplex audio. Thanks to this function, the natural ebb and flow of real face-to-face conversations is maintained. Everyone can be heard and can speak at the same time, without disrupting or interrupting the communication, all with a room-filling clear sound. The "face-to-face" experience is also enhanced thanks to state-of-the-art noise cancellation technology and automatic voice level normalisation. The latter equalises all voices to the same volume level, so everyone is free to express themselves in the way that comes naturally. No longer need to fiddle with the volume each time a different person speaks!

The Jabra Speak2 55 also boasts IP64-rated protection for durability, up to 12 hours of battery life, plug-and-play with USB or wireless connectivity, and USB-C and USB-A connectors on the same cable.

eufyCam S221: one more from the home security champion

The eufyCam S221 (eufyCam 2 Pro) is one more asset in the American brand's sleeve. Building on eufy's reputation for compact, sturdy and high-performance solutions in home security, this camera needs to be connected to the eufy Security HomeBase 2 for operation. One of the attractive characteristics of this system is its 365-day battery life with only one charge! Its 2K resolution and high photosensitivity sensor provide clear pictures for monitoring and recording, even during nighttime. With an IP67 weatherproof rating, eufyCam 2 Pro is also engineered to withstand all weather conditions.

Ultra compatibility: Belkin's 11-in-1 Multiport USB-C Docking Station

Belkin's 11-in-1 Docking Station has an amazing capacity for connecting devices with a range of adapters, and compatibility with Mac, Windows, and Chrome devices. It provides impressive video support with up to 4K resolutions on multiple displays through the DisplayPort, VGA and HDMI ports. But that's only one of its advantages. Thanks to three USB-A ports, one HDMI port, one USB-C 100W PD port, Gigabit Ethernet (GbE), VGA, DisplayPort, SD and Micro SD card slots, a 3.5mm audio port, and passthrough charging up to 100W, users don't have to bear the inconvenience of disconnecting and connecting various adapters!

OUR PEOPLE
New Recruits

A warm and hearty welcome to our newbies as they embark into this new chapter with Elytis.

We take immense pleasure in introducing Aurélie Brune who steps in as our new receptionist, Brianda Aza assuming the role of Operations Assistant and bringing her valuable skills in the Operations department and Chandresh Jaunky who joins us as a pre-sales trainee to the pre-sales department.

WINNER ANNOUNCEMENT

Congratulations to Damien André Aliphon for winning the game from the past Odyssey issues! It's now your chance to win! So, get ready to participate, have fun, and seek those easy-to-find answers to win fantastic prizes!

How to enter:
Send your answers with your full name via email to: odyssey@elytis.mu and accumulate points (1 point per participation, 5 points per correct answer).

Winners will be announced in September 2024.

Best of luck!

1. When was Lexmark International, Inc. Founded?
   A. 1990
   B. 1991
   C. 1995
   D. 1996
